

CLAIMS

1. A textile (1) possessing antilaceration  
properties, which is made from synthetic cables (2)  
5 sheathed with a polymer material, such as polyvinyl  
chloride, and includes, in the warp direction and the  
weft direction, metal cables (3, 4) sheathed with a  
polymer material having a different color from that of  
the polymer material for sheathing the synthetic yarns,  
10 wherein the warp and weft metal cables (3, 4) are  
uniformly spaced by a distance of (d, 1) of less than  
80 millimeters.

2. The textile as claimed in claim 1, wherein the  
15 metal cables consist of wires based on carbon steel and  
wherein the synthetic cables consist of polyester  
yarns.

3. The textile as claimed in claim 1, which includes,  
20 in the warp or weft direction, electrically conducting  
yarns (6-9) sheathed with a polymer material, such as  
polyvinyl chloride, having a color different from that  
of the polymer material for sheathing the synthetic  
cables.

25 4. The textile as claimed in claim 3, wherein the  
electrically conducting yarns are selected from the  
group comprising wires based on a nickel alloy and  
stainless steel wires.

30 5. The textile as claimed in claim 3, wherein the  
electrically conducting yarns are uniformly spaced by a  
distance (D) of less than 50 millimeters.

35 6. The textile as claimed in claim 3, wherein the  
electrically conducting yarns (6-9) and/or the metal  
cables (3, 4) are connected in series along the  
selvedges of the textile.

10086863 030402

7. The textile as claimed in claim 6, which is associated with a device (13) for measuring the electrical resistance of the electrically conducting yarns and/or of the metal cables (3, 4) connected in series.

8. The textile as claimed in one of the preceding claims, which is in the form of a tape.

9. A textile complex which includes a ply consisting of a textile as claimed in one of the preceding claims.

10. The use of the textile as claimed in one of claims 1 to 8 as cladding.

11. The use of the complex as claimed in claim 9 as a tarpaulin or tarpaulin reinforcement.

*"use of" is
